Claims 10-13 and 648-74 are rejected under 35 USC 103 as unpatentable over Arai in view of Ogawa (057), Kohno or Kaida for the specific reasons stated in the previous office action (mailed 5-18-04).

Claims 3, 4, and 6-9 are rejected under 345 USC 103 as unpatentable over Arai in view of Kohno and combined with Grauley or Um for the reasons set forth in the previous office action (5-18-04).

Applicant argues that Arai does not show surfaces of the thin plate sections being parallel to surfaces of either the fixation member or the moveable member because these sections are provided as one integral piece by Arai. It must be noted however, that making parts integral or separable has long been held to be within the skill expected of the routineer. Thus providing the thin plate sections, fixing section and moveable sections of Arai as separate parts would have been obvious to one of ordinary skill in the art. Actually such construction is already shown by other prior art of record (e.g. Brunnee).

Claims 14-41 remain allowed.

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any
